# The Mitchell Difference

*Mitchell Wreath Rings. Ask for them by name.*

We have been told many times, by many customers, "I tried rings that look just like yours, but there is something different about Mitchell rings. I don't know what it is, but it sure makes a difference."

The difference is actually the result of 56 years experience in the wreath ring manufacturing business combined with three vital ingredients.

1. Specially selected ring wire that is designed to be strong, resistant to sagging or warping and yet assure strong welds.
2. A unique steel formulation for our clips. We utilize custom-drawn wire for our clips that prevents spring back after the clip is clamped closed around your wreath materials.
3. A patented wreath ring production process that allows Mitchell Metal Products to weld two distinctly different steels together to create welds that are unbelievably strong. Our process is constantly measured and tested to assure that you receive the most dependable, highest quality wreath ring available.

Whether you purchase your rings direct from us or through one of our many supply partners, ask for **Mitchell Wreath Rings** by name!

# Mitchell Clamp Rings

## FOR MACHINE ASSEMBLY OF WREATHS

Unique Clamp Design   Reduced Labor   Strong, Secure Clamps

Mitchell Clamp Rings are recognized world-wide as simply the best clamp rings available. Specialized manufacturing techniques assure you that Mitchell Clamp Rings will maintain their shape and securely hold foliage to the frame even as the foliage begins to dry out. No other clamp ring offers the same performance value.

### CLAMP RING CLIP COUNTS

Mitchell Metal Products is pleased to announce that we are offering standard and reduced clip count rings on our clamp rings from 18" - 54". You may choose which style works best for you and the foliage you use.

In the past our clamp rings had been produced with one clip for each inch of wreath ring diameter. As a result the spacing between each clip has always been 3.14", regardless of the size of the ring.

The number of clips on large rings as well as the inability to use progressively longer foliage as a wreath diameter increases has been a major draw back for many wreath producers who desire to use clamp rings for larger diameter wreaths. The complaints stem from the fact that too many handfuls are required for each wreath, the foliage width does not increase appropriately for large diameter wreaths and that large clamp rings are simply too time consuming to build. Therefore we now offer a reduced clip version to compliment the standard clip version in our larger wreath rings. Be certain to specify which style ring you desire when ordering.

### CLAMP RING CLIP COUNTS

6" - 16" rings have one clip per ring inch diameter  
(6" has six clips, 8" has 8 clips, 10" has 10 clips, etc.)

18" Clamp Rings Available as 18" w/ 18 clips or 18" w/ 17 clips  
20" Clamp Rings Available as 20" w/ 20 clips or 20" w/ 19 clips  
24" Clamp Rings Available as 24" w/ 24 clips or 24" w/ 21 clips  
30" Clamp Rings Available as 30" w/ 30 clips or 30" w/ 22 clips  
36" Clamp Rings Available as 36" w/ 36 clips or 36" w/ 24 clips  
48" Clamp Rings Available as 48" w/ 48 clips or 48" w/ 32 clips  
54" Clamp Rings Available as 54" w/ 54 clips or 54" w/ 36 clips  
Please see Page 6 for reduced clip clamp rings and prices.

Clamp Rings  
Sizes 6" to 54"

Double Rail Clamp  
Available on 48" and 54"

### CLIP SIZES

## *Mitchell Reduced Clip Clamp Rings*

### *Why Use Fewer Clips?*

In 2006 we began offering reduced clip rings on our 18" - 54" clamp rings. Prior to then our clamp rings had been produced with one clip for every inch of wreath diameter. As a result the spacing between each clip has always been 3.14", regardless of the size of the ring.

In the past, the number of clips on large rings as well as the inability to use progressively longer foliage as wreath diameter increases had been a major draw-back for many wreath producers who desire to use clamp rings for large diameter wreaths. The complaints stem from the fact that too many handfuls are required for each wreath, the foliage width does not increase appropriately for large diameter wreaths and that large clamp rings are simply too time consuming to build.

After several years of testing with numerous types of wreath material we have determined that the following size and clip combinations will address the complaints listed above and thereby save you money by reducing the number of handfuls required for each wreath and also speeding wreath production significantly. It will also allow you to create fuller large diameter wreaths and allow maximum utilization of the bough with less waste. As the ring diameter increases, the space between each clip increases until the spacing maximizes out at 4.7" on 30" and larger diameter rings.

**SAVE TIME: FEWER CLIPS MEAN QUICKER ASSEMBLY**

**SAVE MONEY: INCREASED FOLIAGE YIELD**

**BETTER APPEARANCE: PROPORTIONALLY ACCURATE DIMENSIONS**

# Mitchell Clamp Machines

Part	Description	1
------	-------------	---

589400	"No-Hammer" Clamp Machine	\$127.05
--------	---------------------------	----------

The "No-Hammer"<sup>™</sup> Clamp Machine was introduced in 1995 and has become our most popular machine. It is used for high volume wreath production. It features hardened steel, adjustable jaws. The clamping action of the machine produces a flat clip profile. This allows the machine to tighten around all types of foliage from evergreens to dried flowers. It eliminates the need to hammer clips closed. Stand for machine sold separately.

Part	Description	1
------	-------------	---

589500	Craftmaster Wreath Maker <sup>™</sup>	\$95.20
--------	---------------------------------------	---------

The Craftmaster Wreath Maker<sup>™</sup> is designed specifically for crafters. The mechanism can be ordered separately or together with the Mitchell Metal Stand. The Craftmaster<sup>™</sup> works well with all types of wreath materials from dried flowers to evergreen boughs and produces high quality floral, craft and evergreen wreaths and eliminates the need for glue and picks because the clamping action tightly secures all materials to the wreath frame. The jaws are adjustable for all rings from 6" through 54". This is an ideal machine for small volume producers.

Part	Description	1
------	-------------	---

589320	"Original" Clamp Machine	\$70.00
--------	--------------------------	---------

This is the first clamp machine produced by Mitchell Metal Products and has been the industry standard for many years. It features heavy duty components, adjustable jaws and is designed to produce high volumes of wreaths for many years. The Original Machine creates a high profile clip when closing clips. Some wreath producers then hammer down the clips.

Part	Description	1
------	-------------	---

589760	Mitchell Metal Stand	\$161.00
--------	----------------------	----------

The Mitchell Metal Stand<sup>™</sup> is designed to accommodate all Mitchell clamp machines. The entire stand is assembled in just minutes without the use of tools. Quick snap fasteners secure the legs to the frame and can be removed for easy, quick storage. The stand is built with heavy gage steel tubing and finished with tough powder coat paint. The 31" x 46" top is constructed of aluminum to resist rust and staining.

Part	Description	25*	75	250
583002	Cemetery Wreath Hanger Green Boxed	\$6.10	\$5.26	\$4.41

Mitchell Metal Products offers three sizes of wire easels that work well for a wide variety of wreaths. The frames are green painted. You may choose from 30", 36" and 42" size frames.

The Mitchell Cemetery Wreath Hanger is uniquely designed to adapt to a wide variety of head stones. This is the ideal selection for cemeteries that restrict the use of easels for wreath placement. The hanger easily bends by hand to allow you to attach a wreath or specialty shape to almost every type of headstone or grave marker. Each frame is green painted to resist rust. Sold in boxes of 25.

# Mitchell Hand Tie Rings

## Mitchell Double Rail Flat Rings

Double rail construction allows greens to be tightly secured to the ring frame. The design prevents greenery from twisting around the frame. Heavy duty construction supports heavy wreath weight without bending or losing shape. Sizes 10" through 96". Larger sizes available by special order.

## Mitchell Single Rings

Sturdy wire rings for hand tying wreaths. Deep corrugation helps keep greens firmly in place so they will not twist around the frame.

Special Order Items call for quote, minimum order 500 pieces.

\*Minimum quantity, MMP will not ship less than this quantity. All items priced as boxed if UPS shippable. Bulk items \$0.02 less than price listed if item is listed as boxed.

# Helpful Hints for Specialty Items

## A. Clamp Door Swag

1. Begin at bottom clip with long material.
2. Place shorter (8") material in top clip.
3. Finish by placing a "double handful" in the middle clip to cover the top and bottom exposed clips. A bow may be placed over the last clip.

## B. Clamp Advent Ring

1. Advent rings are assembled in the same fashion as wreaths.
2. Longer material (approximately 1") is required in the clips preceding the candle holders. Longer material in these clips compensates for the wider spacing required for candle holders.

## C. Clamp Candy Canes

1. Start the candy cane at the "hook" end. Work around the hook until you reach the straight portion of the cane.
2. Turn the frame around and begin working from the bottom back toward the hook.
3. When you reach the last open clip, place a "double handful" in this clip. A bow is fastened over this clip to finish the candy cane.

*Continued on Page 16*

# Helpful Hints for Specialty Items

## D. Clamp Christmas Tree

1. Begin at the top of the tree frame and work down one side.
2. Finish the other side of the tree from top to bottom.
3. Once sides are complete work in from the ends on the base of the tree.

## E. Clamp Heart (not illustrated)

1. Hearts are essentially assembled in the same manner as are round wreaths. Begin at the bottom of the heart point and then work your way around the heart until you return to the bottom point. The last handful of materials will cover the stems from the first handful.
2. The top of the heart may require some trimming to regain the heart shape.

## F. Clamp Star

1. Start at the end of one tip and work toward the center.
2. Finish this tip by placing boughs along opposite sides of the tip working from the end toward the center.
3. Finish remaining tips in a similar manner.
4. Finish star by making a wreath around the center of the frame.

F.

# Helpful Hints for Specialty Items

## G. Arches, Horizontal Swags and Mantels (not illustrated)

1. Many specialty shapes such as arches, mantels and horizontal swags are assembled in a similar fashion. First, one clip must be selected as the preferred place for a bow. Often this is the center, but sometimes the bow is offset from the center.
2. Materials are placed in clips working toward the "bow clip."
3. The "bow clip" is the last clip to be filled. Fill with a "double handful." A bow is placed over this clip to finish the frame.

## H. Clamp Mail Box Frame

1. Start at one end. Work toward middle, leaving mid clip open.
2. Turn frame around and repeat.
3. Finish frame by placing a "double handful" in last clip.
4. Bow or other decoration is placed over last clip to finish.

## I. Clamp Grave Blanket

1. Place boughs in top most clip and work toward center.
2. Repeat for bottom half.
3. Place handful of boughs in one "center rail clip" to cover exposed ends at mid frame.
4. Repeat for opposite side.
5. Place large bow over center of frame to complete.

# Wreath Instructions

## Clamp Evergreen Wreaths

### Directions for cutting boughs

Cutting of wreath materials is one of the most important steps in wreath production. Boughs should be cut as uniform in length as possible. Eight to ten inch long pieces work well for 12" rings. Larger pieces are used for larger rings.

## Making the wreath

1. Place ring on the Mitchell Clamp Machine so that one clamp is in grooves of the jaw.
2. Gather a handful of boughs and place in this clip. Keep in mind that more boughs create a fuller wreath.
3. Repeat for each clip, placing each new handful so that it covers the preceding clip. When you come to the last clip, gently pull back the first bunch of boughs so you can tuck the final handful into place.
4. You may add bows, ribbons, beads, pine cones and any other decorations at this time to finish the wreath.

## Floral Wreaths

Review the directions for evergreen wreaths as many important steps are similar.

1. Start by pre-filling the base of the ring with soft material such as Spanish moss. This prevents dried materials from being crushed by the clamping action and reduces the amount of dried items needed to make a full wreath.
2. Place pre-cut dried flowers and other materials in clip as shown in above illustration. Clamp.

3. Repeat this process for each clip, placing each handful so that it covers the preceding clip.
4. Gently pull back the first bunch of materials when you reach the last clip in order to tuck under the initial handful as shown above.
