Factors such as pallet weight, variation in corrugated container weight, and pallet packing can cause actual ship weights to vary. Please contact Mitchell Metal Products to confirm actual ship weights and cost.

Wreath Instructions

Clamp Evergreen Wreaths

Directions for cutting boughs

Cutting of wreath materials is one of the most important steps in wreath production. Boughs should be cut as uniform in length as possible. Eight to ten inch long pieces work well for 12" rings. Larger pieces are used for larger rings.

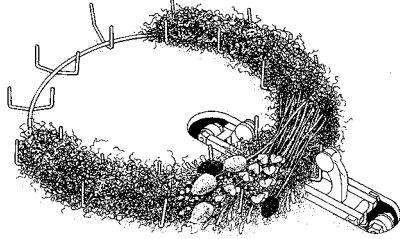

Making the wreath

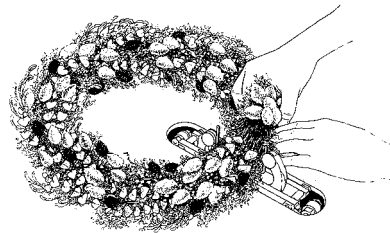

1. Place ring on the Mitchell Clamp Machine so that one clamp is in grooves of the jaw.
2. Gather a handful of boughs and place in this clip. Keep in mind that more boughs create a fuller wreath.
3. Repeat for each clip, placing each new handful so that it covers the preceding clip. When you come to the last clip, gently pull back the first bunch of boughs so you can tuck the final handful into place.
4. You may add bows, ribbons, beads, pine cones and any other decorations at this time to finish the wreath.

Floral Wreaths

Review the directions for evergreen wreaths as many important steps are similar.

1. Start by pre-filling the base of the ring with soft material such as Spanish moss. This prevents dried materials from being crushed by the clamping action and reduces the amount of dried items needed to make a full wreath.
2. Place pre-cut dried flowers and other materials in clip as shown in above illustration. Clamp.

3. Repeat this process for each clip, placing each handful so that it covers the preceding clip.
4. Gently pull back the first bunch of materials when you reach the last clip in order to tuck under the initial handful as shown above.

The Mitchell Difference

Mitchell Wreath Rings. Ask for them by name.

We have been told many times, by many customers, "I tried rings that look just like yours, but there is something different about Mitchell rings. I don't know what it is, but it sure makes a difference."

The difference is actually the result of 60 years experience in the wreath ring manufacturing business combined with three vital ingredients.

1. Specially selected ring wire that is designed to be strong, resistant to sagging or warping and yet assure strong welds.
2. A unique steel formulation for our clips. We utilize custom-drawn wire for our clips which prevents spring back after the clip is clamped closed around your wreath materials.
3. A patented wreath ring production process that allows Mitchell Metal Products to weld two distinctly different steels together to create welds that are unbelievably strong. Our process is constantly measured and tested to assure that you receive the most dependable, highest quality wreath ring available.

Whether you purchase your rings direct from us or through one of our many supply partners, ask for **Mitchell Wreath Rings** by name!

Mitchell Clamp Rings are recognized world-wide as simply the best clamp rings available. Specialized manufacturing techniques assure you that Mitchell Clamp Rings will maintain their shape and securely hold foliage to the frame even as the foliage begins to dry out. No other clamp ring offers the same performance value.

Helpful Hints for Specialty Items

G. Arches, Horizontal Swags and Mantels (not illustrated)

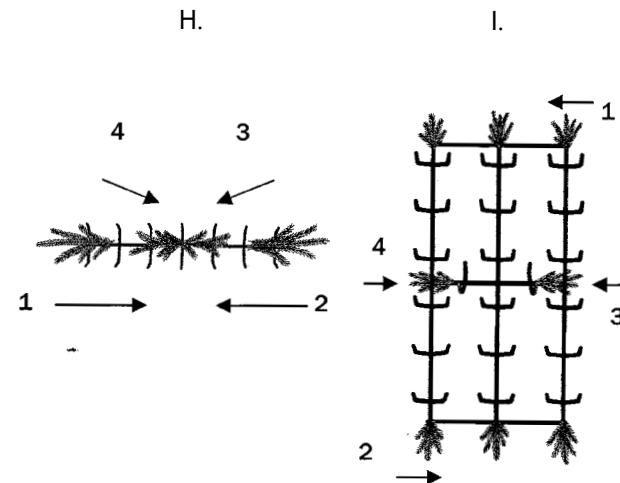

1. Many specialty shapes such as arches, mantels and horizontal swags are assembled in a similar fashion. First, one clip must be selected as the preferred place for a bow. Often this is the center, but sometimes the bow is offset from the center.
2. Materials are placed in clips working toward the "bow clip."
3. The "bow clip" is the last clip to be filled. Fill with a "double handful." A bow is placed over this clip to finish the frame.

H. Clamp Mail Box Frame

1. Start at one end. Work toward middle, leaving mid clip open.
2. Turn frame around and repeat.
3. Finish frame by placing a "double handful" in last clip.
4. Bow or other decoration is placed over last clip to finish.

I. Clamp Grave Blanket

1. Place boughs in top most clip and work toward center.
2. Repeat for bottom half.
3. Place handful of boughs in one "center rail clip" to cover exposed ends at mid frame.
4. Repeat for opposite side.
5. Place large bow over center of frame to complete.

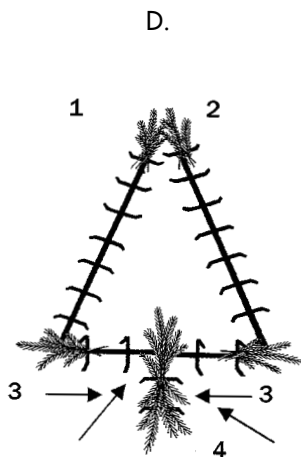

Helpful Hints for Specialty Items

D. Clamp Christmas Tree

1. Begin at the top of the tree frame and work down one side.
2. Finish the other side of the tree from top to bottom.
3. Once sides are complete work in from the ends on the base of the tree.

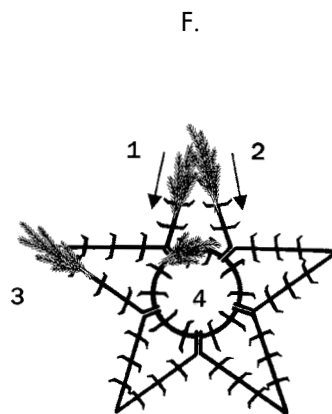

E. Clamp Heart (not illustrated)

1. Hearts are essentially assembled in the same manner as are round wreaths. Begin at the bottom of the heart point and then work your way around the heart until you return to the bottom point. The last handful of materials will cover the stems from the first handful.
2. The top of the heart may require some trimming to regain the heart shape.

F. Clamp Star

1. Start at the end of one tip and work toward the center.
2. Finish this tip by placing boughs along opposite sides of the tip working from the end toward the center.
3. Finish remaining tips in a similar manner.
4. Finish star by making a wreath around the center of the frame.

Unique Clamp Design Reduced Labor Strong, Secure Clamps

CLAMP RING CLIP COUNTS

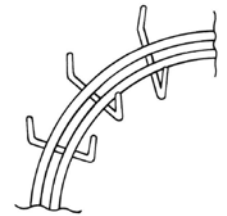

Mitchell Metal Products is pleased to announce that we are offering standard and reduced clip count rings on our clamp rings from 10" - 54". You may choose which style works best for you and the foliage you use.

In the past our clamp rings had been produced with one clip for each inch of wreath ring diameter. As a result the spacing between each clip has always been 3.14", regardless of the size of the ring.

The number of clips on large rings as well as the inability to use progressively longer foliage as a wreath diameter increases has been a major draw back for many wreath producers who desire to use clamp rings for larger diameter wreaths. The complaints stem from the fact that too many handfuls are required for each wreath, the foliage width does not increase appropriately for large diameter wreaths and that large clamp rings are simply too time consuming to build. Therefore we now offer a reduced clip version to compliment the standard clip version in our larger wreath rings. Be certain to specify which style ring you desire when ordering.

Clamp Rings
Sizes 6" to 54"

Double Rail Clamp
Available on 48" and 54"

CLAMP RING CLIP COUNTS

Traditionally clamp wreath rings have one clip for every inch in diameter. Some wreath producers prefer fewer clips. We are proud to offer the following reduced wreath rings.

6" - 16" rings have one clip per ring inch diameter

(6" has six clips, 8" has 8 clips, 10" has 10 clips, etc.)

10" Clamp Rings Available as 10" w/ 10 clips or 10" w/ 8 clips or 10" w/ 9 clips

12" Clamp Rings Available as 12" w/ 12 clips or 12" w/ 10 clips or 12" w/ 11 clips

14" Clamp Rings Available as 14" w/ 14 clips or 14" w/ 13 clips or 14" w/ 12 clips

18" Clamp Rings Available as 18" w/ 18 clips or 18" w/ 17 clips

20" Clamp Rings Available as 20" w/ 20 clips or 20" w/ 19 clips

24" Clamp Rings Available as 24" w/ 24 clips or 24" w/ 21 clips

30" Clamp Rings Available as 30" w/ 30 clips or 30" w/ 22 clips

36" Clamp Rings Available as 36" w/ 36 clips or 36" w/ 24 clips

48" Clamp Rings Available as 48" w/ 48 clips or 48" w/ 32 clips

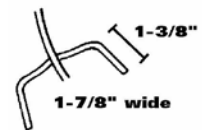

54" Clamp Rings Available as 54" w/ 54 clips or 54" w/ 36 clips

Please see Page 6 for reduced clip clamp rings and prices.

*Minimum quantity, MMP will not ship less than this quantity. All items priced as boxed if UPS shippable. Bulk items \$0.02 less than price listed if item is listed as boxed.

*Pieces 48" or larger will receive a \$45 crate charge.

A. Clamp Door Swag

1. Begin at bottom clip with long material.
2. Place shorter (8") material in top clip.
3. Finish by placing a "double handful" in the middle clip to cover the top and bottom exposed clips. A bow may be placed over the last clip.

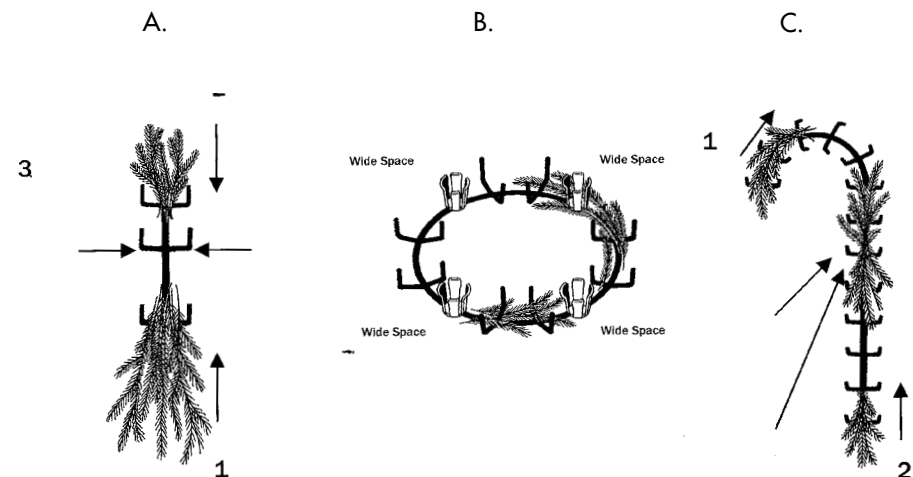

C. Clamp Candy Canes

1. Start the candy cane at the "hook" end. Work around the hook until you reach the straight portion of the cane.
2. Turn the frame around and begin working from the bottom back toward the hook.
3. When you reach the last open clip, place a "double handful" in this clip. A bow is fastened over this clip to finish the candy cane.

B. Clamp Advent Ring

1. Advent rings are assembled in the same fashion as wreaths.
2. Longer material (approximately 1") is required in the clips preceding the candle holders. Longer material in these clips compensates for the wider spacing required for candle holders.

Mitchell Reduced Clip Clamp Rings

Why Use Fewer Clips?

In 2006 we began offering reduced clip rings on our 10" - 54" clamp rings. Prior to then our clamp rings had been produced with one clip for every inch of wreath diameter. As a result the spacing between each clip has always been 3.14", regardless of the size of the ring.

In the past, the number of clips on large rings as well as the inability to use progressively longer foliage as wreath diameter increases had been a major draw-back for many wreath producers who desire to use clamp rings for large diameter wreaths.

After several years of testing with numerous types of wreath material we have determined that the following size and clip combinations will save you money by reducing the number of handfuls required for each wreath and also speeding wreath production significantly. It will also allow you to create fuller large diameter wreaths and allow maximum utilization of the bough with less waste. As the ring diameter increases, the space between each clip increases until the spacing maximizes out at 4.7" on 30" and larger diameter rings.

Mitchell Hand Tie Rings

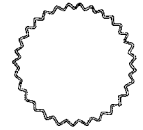

Mitchell Double Rail Flat Rings

Double rail construction allows greens to be tightly secured to the ring frame. The design prevents greenery from twisting around the frame. Heavy duty construction supports heavy wreath weight without bending or losing shape. Sizes 10" through 96". Larger sizes available by special order.

Mitchell Single Crimped Rings

Sturdy wire rings for hand tying wreaths. Deep corrugation helps keep greens firmly in place so they will not twist around the frame.

*Pieces 48" or larger will receive a \$45 crate charge.

Part	Description	1
MINICRF	Mitchell Mini Crafter	\$12.95

Mitchell Mini Crafter is a utility tool which can be used to close clips, one clip leg at a time, for production of low volume wreaths. It also doubles as a tool to re-open clips when necessary. The device is a wonderful tool for crafters who wish to produce one to several wreaths a season. The tubular end of the tool can be slipped over the clip leg to bend it closed over wreath materials. In addition the end has hole through the tubular wall which is used to re-open clips if necessary.

Part	Description	1
NOHAMMR	"No-Hammer" Clamp Machine	\$144.99

*Stand sold separately.

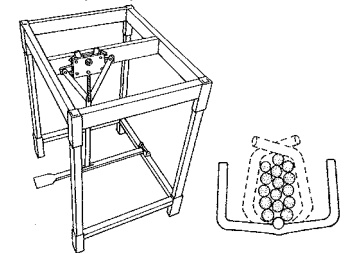

The "No-Hammer"™ Clamp Machine was introduced in 1995 and has become our most popular machine. It is used for high volume wreath production. It features hardened steel, adjustable jaws. The clamping action of the machine produces a flat clip profile. This allows the machine to tighten around all types of foliage from evergreens to dried flowers. It eliminates the need to hammer clips closed.

Part	Description	1
ORIGCLM	"Original" Clamp Machine	\$200.99

*Stand sold separately.

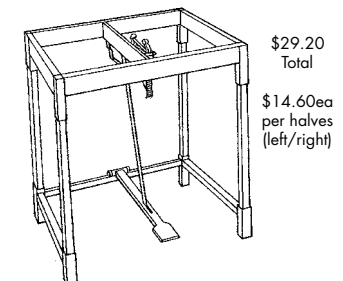

This is the first clamp machine produced by Mitchell Metal Products and has been the industry standard for many years. It features heavy duty components, adjustable jaws and is designed to produce high volumes of wreaths for many years. The Original Machine creates a high profile clip when closing clips. Some wreath producers then hammer down the clips.

Part	Description	1
MMPSTND	Mitchell Metal Stand	\$274.99

Cost for just tabletop

The Mitchell Metal Stand™ is designed to accommodate all Mitchell clamp machines. The entire stand is assembled in just minutes without the use of tools. Quick snap fasteners secure the legs to the frame and can be removed for easy, quick storage. The stand is built with heavy gage steel tubing and finished with tough powder coat paint. The 31" x 46" top is constructed of aluminum to resist rust and staining. Weight is 70#.

Part	Description	1
CRAFTII	Mitchell Craftmaster II™	\$46.95

Available July 5, 2016

Patent Pending

Mitchell Craftmaster II™ is the perfect wreath-production machine for crafters and small volume wreath makers who wish to take advantage of the time-saving advantages of clamp rings. This machine was developed precisely for low volume producers. It features the same closing action of our popular No Hammer machine. It utilizes a gear drive system operated by hand lever which allows the compact machine to be mounted on a table or work bench. It comes with temporary mounting hardware and bracket which can be used to permanently mount the machine. We recommend this machine for users who will produce a small quantity of wreaths each year comes with 30 day warranty against defects in workmanship and operation.

Please see the next page for more info on wreath making tools
